

Who's Democracy? Our Democracy!

Return Our Democracy

Return Our Money

Restore Our

Infrastructure

&

Get the Hell

Out of Our

Government!

Revolution!

We Demand a Freeze on Foreclosures, Renegotiation of Mortgages and a Green WPA-type Infrastructure Rebuild! And You, the Wealthy, Are Going to Pay for It!

Since deregulation was begun in earnest in the 1980's, **how many \$trillions have been diverted** from tax revenue stream to private profit or subsidies from the people's democracy?

Didn't Greenspan sucked consumers and homeowners into a black hole of credit debt through ridiculously low interest rates that everyone, EXCEPT YOU FOLKS, realized could not continue because of the natural physical limits of over-extending monetary resources? The resulting and accelerating low profit margins and the ever accelerating greed for profits caused the business lobby to demand laws that **privatized profit while socializing risk**. This essentially defunded our government and the infrastructure that makes life in a democracy livable, while necessitating war for oil and global trade hegemony.

The Bush Administration was an orgy of the above behavior that has come close to terminating our democracy and totally damaging the potential of a sustainable world where now, everyone, is crying "poor". We realize this problem as the very serious situation it is and demand a reformation to a socially responsible form of democracy with profits regulated, and taxation adequate and fair to provide our democratic republic the resources needed to provide EVERYONE a livable standard of life. **Don't you agree?**
