

Nobel Peace Prize Winning President Obama:

You say you cannot blindly follow the non-violent examples of Martin Luther King and Gandhi and as president must respond to **threats made to the American people**. We ask to you Mr. President, is the greatest threat to the American people made by a few hundred angry men in the deserts of the Middle East, or by **corporations attempting to control every facet of our world's economy**? Oil, coal and carbonizing energy corporations drive our **"national interests"** as rationalization for war in **Iraq, Afghanistan, and Pakistan**. Our American history shows us that we have **overthrown 60 governments**, many too democratic for corporations to profit from and so we have interfered in their national sovereignty out of economic self interest. **All the while, as President Eisenhower so clearly warned us** against, defense contracting corporations have kept the flames of war going to increase their bottom line. In the last 50 years corporations have succeeded in stacking the deck in their favor by using **campaign finance** and inordinate **lobbying** efforts that exceed those of any **ordinary citizen**. As a result, Insurance and Pharmaceutical companies thwart us from joining the rest of the developed world with a **Single Payer Health Care** system. As a result, the Federal Reserve has been turned into a fountain of unlimited cash taken from the pockets of America's working classes and given to financial corporations here and abroad with no accountability, while turning a once proud **banking system into a high risk casino for the wealthy**. As a result, corporations worldwide have cooked up our Earth with a World Trade Organization marketplace that destabilizes poor but once sustainable developing world economies and pollutes the planet with unregulated resource extraction and contamination. As a result, **fewer and fewer can make a living** while a tiny few live in luxurious wealth. As a result, this **pyramid scheme of wealth** attempts to lay ever greater claims to more resources, more access to finances and power to escalate their profits. As a result, they drive the **creation of laws** that allow presidents to **lie**, soldiers to **torture**, administration officials to **commit crimes**, elected officials to participate in foreign **coup d' etats**, remote control **drones kill** innocent foreign citizens, all without threat of punishment. As a result, **Global Climate Disruption** proceeds unchecked because corporations have control over our "democratic" processes worldwide and consequently we are being forced to look forward to the following list of **horrors by 2050**: **mass extinction** of species, including coral reefs and **all edible fish** in our oceans; 50% reduction of snow and glacier based **water** supplies; 200 million **refugees**; catastrophic **drought** in Africa, Australia while catastrophic **flooding** in Asia; altered weather patterns increase severity and alter location of flooding, drought and **storm** surges; **inundation** of Pacific Islands and beaches and **coastal regions worldwide**. As a result, **corporate ownership and consolidation of media** has eliminated accurate reporting of news and events and meaningful public dialog regarding public policy and the overall operations of government as related to the well-being of citizens. As a result, our citizenry is ill-informed and largely unaware of the depth of our current multiple crises and can be manipulated by **information myth scandals** such as the "ClimateGate", "Death Panels", "Swift Boats" and "Death Taxes" engineered to influence public opinion. As a result, corporations lobby the **defunding of our local, state and national governments** to reduce their tax burden, eliminate public safety nets and labor laws, and attempt to force defunded governments into **privatizing** public infrastructures, including schools, hospitals, water, waste, energy, roads ... anything they think they can take over and over-charge us for. As a result, our democracy has been turned into a tyrannical oligarchy of monied and powerful interests and **we want our democracy back!**

Dear Mr. President, What We Want From You:

place
stamp
here

NO MORE WARS FOR EMPIRE

**A Climate Treaty with Carbon Tax, Feebates
and Ratification of the Earth Charter**

Single Payer Health Care

**Restore Taxation of Wealth &
a Stop to all Privatization**

Nationalize the Banks

24 Million Residential Solar Rooftops

**FREE PUBLIC TRANSPORTATION
AND NATIONAL TRAIN SYSTEM**

FREE PUBLIC EDUCATION THROUGH COLLEGE
